## ENCORE SERVICES

ISO 17025 calibration services for DC nutrunners, torque transducers and torque wrenches. Encore provides complete repair for many OEM manufacturers of torque equipment. We service the entire system; controller, cable and tool. We pride ourselves in fast and cost effective repairs for manufacturers of all sizes. We can re-gauge many different types of torque transducers avoiding costly replacements. Encore engineers can design and build torque related applications as well as problem solving for existing applications. Our custom design calibration carts allow us to perform onsite calibration/validation at your facility. Custom tool tracking software allows organization and tracking of your torque equipment, including calibration history, repair history and calibration due notifications.

## FASTENING SERVICE

- **TOOL & CONTROLLER REPAIR FOR ALL MAJOR MANUFACTURERS**  
Atlas Copco, CP Tech-Motive (GSE), Cooper, Rotor, Cleco, Ingersoll-Rand, Stanley, ITD, Gardner Denver, Georges Renault, Aimco, Uryu, FEC and Estic
- **TRANSDUCER REPAIR OF ALL MAJOR MANUFACTURERS**  
Re-gauge, 17025 Calibration
- **CABLE REPAIR**  
Atlas Copco, CP Tech-Motive (GSE), Cooper, Rotor, Cleco, Ingersoll Rand, Stanley, ITD, Gardner Denver, Georges Renault, Aimco, Uryu, FEC and Estic
- **ISO 17025 CALIBRATIONS**  
DC Tools, Transducers, and Torque Wrenches
- **COMPLETE DC ELECTRIC MOTOR REMANUFACTURING**  
Includes 1 year warranty
- **DESIGN SERVICES**  
Engineering services to help solve your manufacturing problems. Reverse Engineering
- **TOOL TRACKING SOFTWARE**  
Automated tracking of all repairs, preventative maintenance schedules, calibration. Statistical information for repair costs, number of repairs, and much more.
- **SERVICE CONTRACTORS**  
Focus on your core business, let Encore manage your DC and Air tool repairs/calibrations. We offer onsite service contracts to help eliminate downtime and improve quality.

## ONSITE VALIDATION/ CALIBRATION

Encore provides onsite validation and calibration services. Our custom designed calibration cart allows Encore's engineers to provide onsite calibration of all your DC tools up to 1000 ft lbs, transducer calibration and torque wrenches. All information is entered into Encore's software tracking system for permanent storage of statistical data and calibration alarms. Contact us for a consultation visit.

## TOOL TRACKING SYSTEM

Encore has developed a network based software system for tracking fastening tool calibrations, validations, preventive maintenance and repairs. This unique system provides complete analysis of repairs, with average costs and detailed work reports. The system also tracks calibration and validation frequency in your manufacturing plant. Tool location information is stored to help you locate where a specific tool is in your facility.

## AUTHORIZATIONS

Encore Systems is an authorized distributor for the following companies:

- \* **Stanley Assembly**
- \* **Sturtevant Richmond**
- \* **Wera Tools**

We have direct relations with the following OEM's:

- ASG
- Hios
- Deprag
- FEC
- Estic
- Cinetic Automation
